It's a quirky little game that doesn't take itself too seriously!

Let out a demon? Bards later will sing songs about how your character is a dimwit! It is definitely not politically correct, which makes it all the more funny!

Also in what other game can your character go cow tipping?

While I haven't played much the Steam version I have played other versions to the very end, of which there are three endings (don't worry I won't give them away too much) just suffice it to say, you can side with the demoness, fight the demoness, or just walk away! How many games have an ending where you can just walk away leaving undead to walk the Earth? Two of those endings are rather funny, and disgusts the narrator!. This should have been the first Holmes game by Frogwares. It's a very standard PNC adventure, but here the puzzles make sense and the game politely doesn't let you continue if you've missed something. Insofar as that goes, it's not unwinnable by design except for a small bug that you'll probably never encounter.

While not particularly difficult, the worst bits are the two timed events and those are your only chances to prematurely lose the game. Other than that, it's great fun with some decent voice acting and the plot is full of the expected twists. As a word of warning, the game does quiz you after each chapter to ensure you're paying attention.. cool, funny and interesting game. Also easy achievements.. Literally just doesn't respect your time.

Many instant death pit falls, long travel time between screens that contain nothing, no map, an overworld that doesn't clearly delineate what things you need, damage as a deterrent (completely unclear where to go without just being bodied by enemies that you can't kill)

This isn't a very good metroidvania, as the backtracking is long, punishing, and unrewarding.

The people that complain about the hitboxes are complaining that their rancid meat has cucumbers on it instead of the pickles they ordered.. Really Fast and Furious game to play with friends.

And don't bother !

There're no brakes !

It wont play when its load the race. Swindled by NIS, again. Got this game hoping to see some proper multiplayer co-op in raneons. Its ClaDun X2 with half♥♥♥♥♥multiplayer.

Its not worth 20 bucks.. This is a fun DLC you can summon minions and they fight for you. Unfortunately this character has no attacks of its own. This is annoying sometimes as you can get frustrated with not being able to attack. But, you can fly so... it\u2019s worth it.. The game has potential, but it currently lacks replayability. The art style reminded me of job simulator and from the trailer, the concept was interesting. Unfortunately this is something you play once and probably won't come back to. The platform your on moves up automatically and way too fast to be able to clean both left and right windows while dipping your sponge in the soap bucket and taking care of hitting birds. I wasn't able to admire the height because you go up so quick and your just too busy cleaning windows. You should be able to control the speed of how fast you go up.. I am really enjoying the game. I had read some negative comments about the game but I have found that they are probably niche frustrations, because as a whole this is very fun. I haven't seen a downside to it at all. Worth the money. Especially if you love Tropico!. Bowling is far too fast to enjoy this game.. It's pretty much what it promises - Q3 V UT in a top-down perspective and an environment that reminds one of Alien Breed. Could use some more players though.

Highly recommended if you like old school arena fragging!. Currently worth about 5 bucks at most compared to what other games are offering. I was looking forward to this one, but I find the AI\punching mechanics to be worse than Thrill of the Fight or Drunk'n Bar Fight. Both of these games have more to them anyway. Both of those games offer a better experience as far as boxing\punching goes and they are priced about 50% cheaper.

In the current flood of VR titles, \$20 is simply way too much for what this game offers. 10 more dollars and you can get Arizona Sunshine. Something is wrong with that.
